What Is History?

Some of the key events we study are...the use of the atomic bomb, sinking of the Titanic, life of Joan of Arc

We study change over time in towns and cities, as well as our own families

We look at how things change and continue over time...with power, religion and culture.

AD - years after 0!
BC - years before 0!

What history can you remember? We think back to our favourite history lesson in primary school - what did you learn?

Forming judgements and having our own opinions are very important! But they must be backed up with evidence. We look at forming judgements, considering opinions and weighing up evidence.

Evidence can come in different forms! Verbal, image, archaeological, written

We look at primary and secondary evidence.
