

Arup Design Programme

July 1st to 5th 2024

Arup Design Programme

Your one week work experience programme will give you:

An insight into the day-to-day lives of engineers, designers and consultants working within the built environment. Working closely with Arup members, students will be challenged, advised and receive first-hand knowledge from experts in their respective fields, whilst taking on a range of tasks and activities centred around a fictitious project brief.

The Project Brief

Undertake a bespoke, immersive and hands-on task brief designed to ensure students apply the knowledge they gain to practice engineering and design solutions for a real-world scenario.

July 1st to 5th 2024

Team Working

Work collaboratively in teams to complete tasks.

Intro to specialist areas

Find out about these specialisms and more:

Civil

Environmental

Structural

Acoustic

On your final day you will:

Present your ideas

Within your teams, you'll prepare and deliver a presentation for a panel of judges from Arup, detailing how you responded to the project brief.
