

Design Technology Department Department

The Design Technology Department consists of five experienced specialists led by a Subject Leader who works with a Leadership Link. In addition, two experienced technicians support the department. We offer a supportive environment in which all staff are encouraged to work collaboratively, share subject knowledge and good practice, and engage with pedagogical research as part of their ongoing professional development.

We aim to develop a challenging, engaging and representative curriculum that strives to meet the needs of all. Design Technology at All Saints is designed to inspire our students to become independent, confident, creative and resilient learners.

The Design Technology Department is located in five specialist rooms including, two fully equipped food rooms, two workshops, a textiles room and a CAD/CAM suite. Rooms are well equipped with interactive whiteboards and a laptop trolley. The department holds subscriptions to a number of online resources such as Hodder Boost and Illuminate.

In KS3 all students study Food and Nutrition, Design Technology and Textiles. All three subjects are popular options for GCSE study. Pupils follow the AQA GCSE courses. At Post 16, the WJEC Level 3 Food Science and Nutrition qualification and Design Technology AQA A-Level are taught.

We welcome applications from inspiring teachers who will be committed to developing the knowledge of our students and who are able to inspire students of all abilities and ages to achieve their highest potential.
